MONSOON

Active Ingredients

- tebuconazole

MONSOON fungicide provides broad spectrum disease control available to help maximize yield and profit potential in wheat and barley, controlling both scab and leaf disease.

Product Benefits:

- Preventative scab activity
- Reduce DON (vomitoxin) levels
- Halts foliar diseases present at application and stops new infections from attacking the crop
- Compatible with most insecticides and herbicides
- Improved yield protection
- Effective broad spectrum disease control of many foliar diseases on over 20 crop groups
