Active Ingredients

- chlorpyrifos

WARHAWK is a broad spectrum insecticide that provides consistent protection against some of the most damaging insect pests in more than 50 crops.

Warhawk is a restricted use pesticide.

Product Benefits:

- Application flexibility - can be soil or foliar applied by ground or air
- Tank mix flexibility - compatible with many pesticides and fertilizers to reduce number of field passes
- Broad spectrum control - labeled on over 50 crops and over 140 insects
- Wide window of application - allows application during economic threshold
- Consistent performance
- WARHAWK kills insects through contact and/or ingestion and the temporary vapor produced can reach susceptible insects where spray droplets can't
