Wrangler
INSECTICIDE

Active Ingredients

- imidacloprid

WRANGLER is an effective residual insecticide with excellent knockdown that controls a host of sucking and piercing pests in cotton such as plant bugs, cotton aphids and stink bugs.

Product Benefits:

- Controls many insects that show resistance to other insects
- Maintains population of beneficials while controlling yield robbing pests
- Low application rates and minimal risk to workers and environment
- 12 hour REI and non-restricted use pesticide
