SWAGGER

Active Ingredients

- bifenthrin
- imidacloprid

SWAGGER® insecticide combines the quick knockdown of a pyrethroid with the long lasting residual of a neonicotinoid in a superior formulation.

Swagger is a restricted use pesticide.

Product Benefits:

- Quick knockdown
 - Fast kill of yield-robbing insects
- Long-lasting residual
 - Less trips across the field saves time and money
- Broad spectrum
 - Controls target insects plus secondary yield-robbing insects
 - Less time tank mixing multiple insecticides together
- Superior formulation
 - Mixes easily with nutritionals and other crop protection products
 - Storage stability for long shelf life
