**PROTOCOL**

## Active Ingredients

- thiophanate-methyl
- propiconazole

PROTOCOL is the only pre-mix of thiophanate-methyl and propiconazole available in the market today. These two broad spectrum fungicides provide preventative and curative activity on leaf and stem diseases and white mold.

### Product Benefits:

- Two modes of action for active disease control and resistance management strategy
- Curative and preventative activity
- White mold activity on soybeans and peanuts
