

AQUA FORCE is a uniquely formulated water use efficiency product for center pivots. With a novel composition, AQUA FORCE is designed to enhance water distribution, retention, and infiltration to support optimal moisture in the soil.

PRODUCT FEATURES

- Increases water holding capacity and distribution in the soil profile
- Enhances water distribution, water retention, and water infiltration to support proper moisture in the soil

RATES

1 qt/A at V4 followed by 1 qt/A at VT in corn

DATA & RESULTS

AQUA FORCE ROOT STRUCTURE

2024 Irrigation Research Farm (IRF) – Yuma, CO

GSP

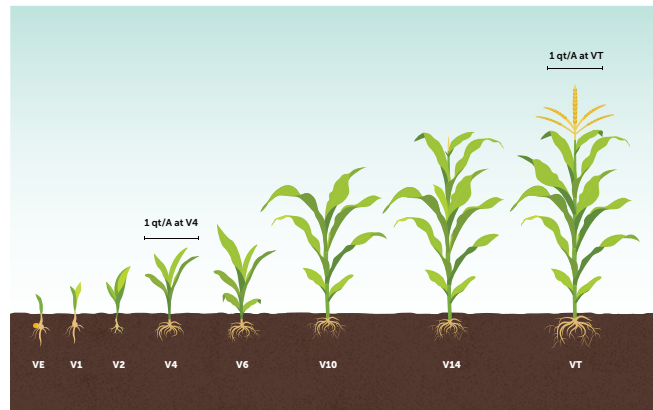

VS.

with AQUA FORCE

Higher soil water content from adding AQUA FORCE allows for lower compaction, resulting in optimized growing conditions.
