

CHOICE® TRIO is a non-AMS liquid water conditioner designed to aid in the performance of chemistries susceptible to the negative effects of hard water, including herbicides, fungicides, insecticides, and nutritionals. CHOICE TRIO performs via three modes of action: sequestering, chelating, and complexing of all hard water cations.

PRODUCT FEATURES

- Water conditioner: sequestering, synthetic chelating, and complexing
- Non-AMS formulation

RATES

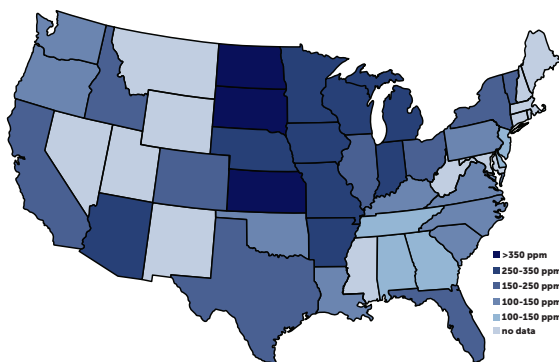

1-2 qts/100 gal spray solution

GROWER BENEFITS

- Reduces effects of hard water on pesticide performance without the use of AMS
- Effective on all hard water cations
- Can be used in applications where AMS is not recommended but water conditioning is required

DATA & RESULTS

| HARD WATER MAP STATE AVERAGE

*Hard Water Map based on 2023 Test Your Water Campaign results with participating LSM data.

| CHOICE TRIO VS AMS

CHOICE TRIO

- 3 Modes of Action
- Lower use rate
- Easy-to-use liquid formulation
- Effective on all hard water cations
- More consistent performance

AMMONIUM SULFATE

- 1 Mode of Action
- Higher use rate
- Dry 51 lbs bags (Liquid options available)
- Effective on calcium cations only
- Volatile and unpredictable
