

M^{SO}® CONCENTRATE WITH LECI-TECH is a methylated seed oil that contains premium emulsifiers, along with **LECI-TECH®** chemistry, providing uniform mixing for excellent performance as well as drift reduction, enhanced penetration and droplet adhesion. The premium emulsifiers, along with LECI-TECH chemistry, provide uniform mixing for excellent performance as well as drift reduction, enhanced penetration and droplet adhesion. **M^{SO} CONCENTRATE WITH LECI-TECH** is designed for use with post-emergent herbicides and has consistently demonstrated increased penetration over conventional crop oil concentrates.

WITH LECI-TECH TECHNOLOGY 

To the plant:
Drift reduction with performance-sized droplets

On the plant:
Droplet retention by adhesion and spreading

In the plant:
Increased penetration without cuticle disruption

PRODUCT FEATURES

- Formulated with premium emulsifiers
- Contains LECI-TECH, a unique technology that assists overall spray performance

GROWER BENEFITS

- Delivers increased plant uptake vs. standard **M^{SO}** formulations

RATES

1-2 pts/A

DATA & RESULTS

| SUPERIOR CUTICLE PENETRATION

Methylated seed oils (MSOs) are utilized when superior cuticle penetration is needed as plants develop thick waxy cuticles in an effort to conserve moisture. The photo above compares the differences in activity of water, crop oil and **M^{SO} CONCENTRATE WITH LECI-TECH**.
