

THRUST is a highly processed, sprayable-grade ammonium sulfate/polymer adjuvant designed to improve and efficacy of post-emergence herbicides requiring ammonium sulfate. THRUST also contains a drift reduction/deposition aid, which reduces spray fines and improves deposition on plant vegetation.

FEATURES

- Dry formulation
- Antifoam component ensures easy handling in the tank
- Approved with over-the-top 2,4-D weed control systems

RATES

9-17 lb/100 gal

GROWER BENEFITS

- AMS component manages calcium hardwater cations
- Polymer component controls drift
