

AURA CITRUS is a biopesticide product for management of common citrus diseases including citrus greening (HLB) and citrus canker. AURA CITRUS triggers a unique Multi-Potent Response™ (MPR), activating a plant’s natural defense systems to provide additional long-lasting protection against HLB. AURA CITRUS improves overall tree performance and enhances yield on a diverse range of citrus varieties.

MULTI-POTENT RESPONSE (MPR):

- AURA CITRUS activates plant defense responses to restrict the growth of pathogens, leading to an increase in yield while maintaining quality
- Production of antimicrobial enzymes and molecules
- Strengthening of cell wall structure
- Upregulation of plant defense genes and hormones

GROWER BENEFITS

- Targeted disease control for HLB for enhanced quality and yield
- Unique mode of action for resistance management
- No maximum residue levels (MRL) or contribution to MRL considerations for marketing
- Excellent safety profile with low toxicity to pollinators, wildlife, and applicators

RATES

- 25.6 fl. oz./100 gal carrier volume
- Label range: 25.6-51.2 fl. oz./100 gal carrier volume
