

BROMAC® ADVANCED

BROMOXYNIL	GROUP	6	HERBICIDE
MCPA	GROUP	4	HERBICIDE

BROMAC® ADVANCED is a selective post-emergence herbicide for control of important broadleaf weeds infesting wheat, barley, oats, rye, flax and grass grown for sod. Optimum weed control is achieved when BROMAC ADVANCED is applied to actively growing weed seedlings. Thorough coverage of the weed seedlings is essential for optimum control.

PRODUCT FEATURES

- Powerful combination of active ingredients providing two modes of action
- Convenient application options
- Labeled for use in wheat, barley, oats, and rye

RATES

See label for specific use rates.

GROWER BENEFITS

- Offers control in 50+ weed species including lamb's quarters, waterhemp, ragweed, and kochia
