

Altura[™] is a phosphate and zinc nutritional product for progressive farmers interested in more mobile, significantly more available phosphate to aid root growth and development. Built with C² Technology, the unique formulation of Altura maximizes uptake and extends availability of phosphorus for a robust approach to early season nutrient management.

FEATURES

- Unique C² formulation maximizes phosphorus and zinc availability and mobility in the soil and superior uptake in the plant
- Contains highly available Ortho Phosphate and readily accessible zinc
- Non-phytotoxic nutritional formulation is flexible in application and sound for many crops in many growing conditions

GROWER BENEFITS

- Immediately available phosphorus enhanced to provide extended nutrient access at critical growth stages for a season long nutritional solution
- Pairs well with other nutrients to increase their uptake and performance
- Supplies phosphorus and zinc to encourage early season growth and development

ANALYSIS

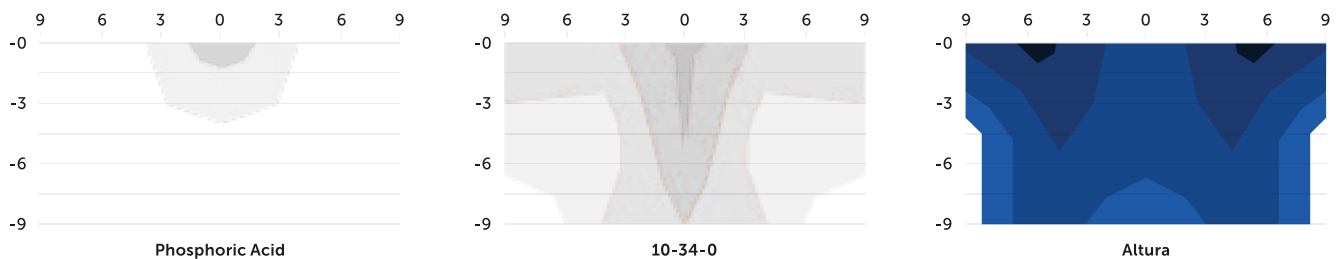

7-21-0 .2 Zn with C² Technology

RATES

2-10 gal/A for most crops and applications

ALTURA[™]

Distribution of Available Phosphorus 42 Days After Application of 1/2 inch of Untreated Water

Altura is built with C² Technology – a proven platform for phosphorus availability – Altura is more soluble than many forms of phosphate for short term availability as well as availability up to 42 days after application to the soil.
