

**Ativus™ PK** is a versatile nutrition solution designed to meet needs of many crops at all points of the nutrient demand curve throughout the growing season. By delivering highly available phosphorus for early development and readily absorbed potassium to support crop quality - Ativus PK is a flexible tool in a grower's nutritional toolbox to meet the yield and quality goals of the most demanding growers.

## FEATURES

- Unique C<sup>2</sup> formulation maximizes phosphorus and potassium availability for superior uptake in the plant
- Designed to optimize leaf penetration for fast uptake
- Formulated to provide season-long availability of nutrition

## GROWER BENEFITS

- C<sup>2</sup> formulation maximizes nutrient availability and mobility to drive yield and quality
- Contains 20% readily available phosphate & 15% soluble potash to support season long growth and vigor
- Enhances buffering capacity to moderate the effect of salts in a foliar fertility blend

## ANALYSIS

2-20-15 with C<sup>2</sup> Technology

## RATES

2-8 qt/A for most crops and applications

## | C<sup>2</sup> TECHNOLOGY

### Carbon

- Unique carbon components drive chemical and biological activity in the soil as well as promote soil structure.
- Carbon serves as a storage structure for the beneficial soil microbiome.

### Extracted

- Proprietary method creates customized carbon extractions to meet the unique needs of each nutrient with which they are combined.
- Extraction method results in a more stable end-product, soil microbiome.

### Carbohydrate

- A food source for beneficial soil microbes as well as an energy source for the plant.
- Assist in complexing nutrients for increased availability.

### Reacted

- Nutrients are reacted under heat and pressure to form a stronger bond to increase fertilizer efficiency and reduce soil tie up.
- Resulting complex provides flexibility in application.
