

# ENSURGO

**Ensurgo** is a 7-24-2, 80% orthophosphate-based starter fertilizer containing proven Accomplish LM biocatalyst technology to provide consistent value and greater potential for yield.

## FEATURES

- Recommended for corn, wheat and cotton
- Low-salt, seed-safe orthophosphate formulation provides a high load of plant-available phosphate
- Biocatalyst component enhances nutrient mineralization of applied nutrients and those bound to the soil colloid that are in close proximity to the seedling plant

## GROWER BENEFITS

- Offers more optimal levels of plant-available phosphorus
- Improves stand establishment and early season vigor
- Increases nutrient availability to the seedling and improves early season root development
- Provides greater plant performance and more uniform plant development

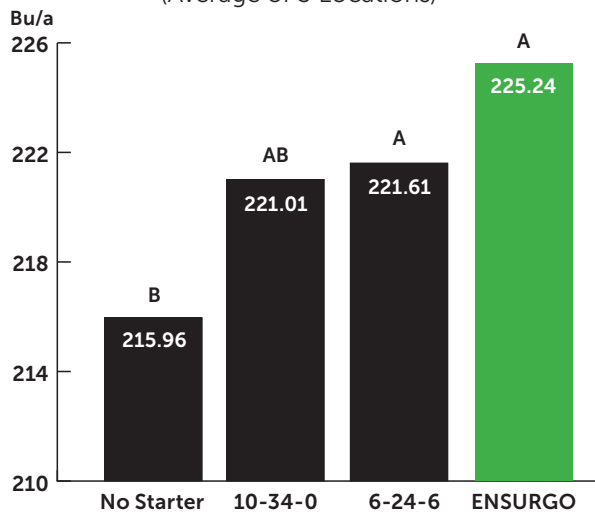

## ANALYSIS

7-24-2 + Accomplish LM (5% of volume)

## RATES

2–10 gallons/A (in furrow preferred); Optimal rate of 5 gals/A

**In-Furrow Corn Starter Trial**  
(Average of 3 Locations)

Note: Combined yield results from third-party cooperators in 3 locations (KY, WI, IA). All starter fertilizers applied at 5 gals/A. LSD .05=5.19, CV=13.47, Prob > F 0.0070\* (TRT), Prob > F = < .0001\* (LOC)

**Corn Starter Trial – McLean County, IL**  
Ensurgo applied in furrow

No Starter

ENSURGO

Note: Ensurgo applied at 5 gals/A.
