INTENSITY ONE Post-Emergence Grass Herbicide for control of volunteer corn.

INTENSITY ONE is a superior post-emergence grass herbicide containing proprietary LECI-TECH chemistry which results in the fastest and most complete grass control available.

Product Benefits:

- Better penetration of canopy and cuticle
- Outstanding weed control even during adverse environmental conditions (hot, dry conditions, cool temperatures, etc.)
- The option to plow or cultivate after spraying without hampering efficacy
- Better translocation resulting in more complete control
- Fast control in soybeans or cotton: Quicker control means less crop stress and less soil moisture depletion

Active Ingredients

- clethodim
