VADER is a unique, proprietary adjuvant designed to aid in the delivery and deposition of insecticidal sprays. The premium formulation, including acidifying agents, helps provide a spray solution environment that protects the integrity of insecticides sensitive to high pH (alkaline) solutions.

#### Product Benefits:

- TO: Drift reduction with performance-sized droplets
- ON: Droplet retention by adhesion and spreading
- IN: Increased penetration without cuticle disruption
- Acidification properties reduce spray solution pH, preventing pesticide degradation and maximizing performance
- 90% active and low odor formulation
- Maximizes performance of neonicotinoid insecticides

#### Active Ingredients

- Contains Leci-Tech technology
