DFT 6 EC is an important component of any cotton harvest aid program due to its superior performance on mature leaf drop, providing a fast, efficient and flexible cotton defoliation.

Product Benefits:

- Herbicidal defoliant that causes leaf injury resulting in ethylene synthesis and leaf drop
- Excels at mature leaf drop
- Mostly applied in a tank mix with products containing thidiazuron and/or ethephon:
 - For increased activity on juvenile leaves
 - To enhance boll opening
 - To control regrowth
- Rainfast one hour after application

Active Ingredients

- tribufos
