DFT 6 EC is an important component of any cotton harvest aid program due to its superior performance on mature leaf drop, providing a fast, efficient and flexible cotton defoliation.

## **Product Benefits:**

- Herbicidal defoliant that causes leaf injury resulting in ehtylene synthesis and leaf drop
- · Excels at mature leaf drop
- Mostly applied in a tank mix with products containing thidiazuron and/or ethephon:
  - For increased activity on juvenile leaves
  - o To enhance boll opening
  - o To control regrowth
- Rainfast one hour after application
