Active Ingredients

- Sulfentrazone 39.6%

ARTERIO™ 4F is a great pre-emergent tank mix option to manage resistant and hard-to-kill weed populations in over 25 labeled crops and crop groups. This Group 14, PPO-inhibitor herbicide has shown strong residual control of these challenging weed populations so you can start your season off with clean fields. ARTERIO™ 4F can be used on both GMO and conventional soybeans.

Product Benefits:

- Great resistant-management tool for controlling herbicide-resistant weeds
- Extended residual control
- Excellent tank mix compatibility
- Labeled for use on over 25 crops and crop groups
