This seed has been treated with **DYNA-SHIELD CONQUEST™** (imidacloprid, metalaxyl, thiophanate-methyl, and fludioxonil)

- **DO NOT** use for feed, food, or oil purpose.

**THE US ENVIRONMENTAL PROTECTION AGENCY REQUIRES THE FOLLOWING STATEMENTS ON BAGS CONTAINING SEEDS TREATED WITH DYNA-SHIELD CONQUEST (imidacloprid, metalaxyl, thiophanate-methyl, and fludioxonil).**

- **Groundwater Advisory:** Metalaxyl is known to leach through soil into groundwater under certain conditions as a result of agricultural use. Use of this chemical where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

- **Pollinator Precautions:** Imidacloprid is highly toxic to bees. Ensure that planting equipment is functioning properly in accordance with manufacturer specifications to minimize seed coat abrasion during planting to reduce dust which can drift to blooming crops or weeds.
- **DO NOT** allow children, pets, or livestock to have access to treated seed.
- **DO NOT** graze or feed livestock on treated areas for 45 days after planting.
- **DO NOT** apply a neonicotinoid insecticide within 45 days of planting seed treated with DYNA-SHIELD CONQUEST.

Exposed treated seed may be hazardous to birds and wildlife. Cover or incorporate spilled treated seeds. Excess or leftover seed may be double-sown around the headland or buried away from bodies of water in accordance with local requirements.

- Dispose of seed packaging in accordance with local requirements.
- **DO NOT** contaminate water bodies when disposing of planting equipment wash water.
- **DO NOT** allow children, pets, or livestock to have access to treated seed.

- **In the event of a crop failure or harvest of a crop grown from DYNA-SHIELD CONQUEST treated seed, the field may be replanted immediately to artichoke, barley, borage, Brassica (cole) leafy vegetables, bulb vegetables, canola, cilantro, corn (field or sweet), cotton, cranberry, cramble, cucurbits, eggplant, flax, groundcherry, leafy petiole vegetables, leafy vegetables, legume vegetables (succulent or dried including soybean), millet, mustard seed, oats, okra, pepinos, pepper, poppy, potato, rapsseed, rye, safflower, sorghum, soybean, strawberry, sugarbeets, sunflower, tomatillo, tomato, triticale, root and tuber vegetables, watercress, and wheat. For cereals including buckwheat, and rice; the minimum plant-back interval is 30 days from the date DYNA-SHIELD CONQUEST treated seed was planted. Cover crops for soil building or erosion control may be planted at any time; but do not graze or harvest for food or feed. For all other crops not listed on an imidacloprid label, or for crops for which no imidacloprid, tolerance for the active ingredient has been established, a 12-month plant-back interval must be observed.

- The maximum application rate (including seed treatment, foliar application, and soil application) per acre per calendar year for imidacloprid is 0.5 lbs.

  - This seed has been treated with ___X_ lbs imidacloprid per ___ lbs of seed (or ___X_ mg imidacloprid per seed).
  - This seed has been treated with ___X_ lbs metalaxyl per ___ lbs of seed (or ___X_ mg metalaxyl per seed).
  - This seed has been treated with ___X_ lbs thiophanate-methyl per ___ lbs of seed (or ___X_ mg thiophanate-methyl per seed).
  - This seed has been treated with ___X_ lbs fludioxonil per ___ lbs of seed (or ___X_ mg fludioxonil per seed).

- Excess treated seed may be used for ethanol production only if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticides remain in the ethanol by-products that are used in agronomic practice.

- Cereals including buckwheat, and rice; the minimum plant-back interval is 30 days from the date DYNA-SHIELD CONQUEST treated seed was planted. Cover crops for soil building or erosion control may be planted at any time; but do not graze or harvest for food or feed. For all other crops not listed on an imidacloprid label, or for crops for which no imidacloprid, tolerance for the active ingredient has been established, a 12-month plant-back interval must be observed.

- **The maximum application rate (including seed treatment, foliar application, and soil application) per acre per calendar year for metalaxyl is 0.5 lbs.**

  - This seed has been treated with ___X_ lbs metalaxyl per ___ lbs of seed (or ___X_ mg metalaxyl per seed).

- This seed has been treated with ___X_ lbs thiophanate-methyl per ___ lbs of seed (or ___X_ mg thiophanate-methyl per seed).

- This seed has been treated with ___X_ lbs fludioxonil per ___ lbs of seed (or ___X_ mg fludioxonil per seed).

- Excess treated seed may be used for ethanol production only if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticides remain in the ethanol by-products that are used in agronomic practice.
